

Three equal panels of beaded lace are separated by "seams" of a ribbed cross-lace pattern. A third pattern creates the all-around wavy edge. The resulting shape is roughly three sides of a square. When centered over the back, the region the seams provide is able to fit the shoulders. When diagonally with the "point" centered at back and front and the open ends draped over one shoulder, the shawl-like has an asymmetrical look. Suitable for intermediate knitters, best with some lace-knitting experience.
